This download is a full version of the PDS NSF Security Remover utility that is capable of removing NSF security from secured Lotus Notes database files on the local computer. NSF security prevents users of Notes from accessing locked database files. NSF file is a set of attachments to any particular database file. When this attachment is removed, the NSF format is removed from the

Notes database file and you will be able to access your database normally. If the attachment is removed from the database, then you cannot access it anymore or the database file is no longer recognized by Lotus and you get an error message. In addition, it also removes Lotus security information from the database file and allows users to access the file as if the database file is totally unlocked. PDS NSF Security Remover is a software program that can erase the

security from Lotus Notes security database files which appears after installing NSF security module. NSF security allows using shared database files by providing password protection for certain databases. You need to enter NSF password to open a secured Notes database file. If you forget this password, then you cannot access the file and you get an error message. The error message looks like: "The security for the database file Notes1.nsf is not correct. The login

required to use this database file is invalid." When you try to open any Lotus Notes database file which security has been protected by NSF, you may receive error message like this one: "The database file is locked with NSF security. You cannot open it until you remove the security." NSF security prevents users from accessing the protected Notes database files. Safest way to remove Lotus security from NSF secured database files When you are facing this

exact error message "The database file is locked with NSF security. You cannot open it until you remove the security", which makes you really frustrated because you cannot open any database file without security then you will find that, the PDS NSF Security Remover is the best and cheapest solution to remove Lotus security from NSF file. PDS NSF Security Remover is a tool that removes Lotus NSF security from Lotus Notes database files. This tool can access any

Notes database file and remove NSF security instantly and you will get a prompt message after removing the Lotus NSF security. In addition, this tool provides the easiest way to remove NSF security from any Notes database file. You can use this tool to crack your NSF security file and remove Lotus security from Lotus Notes

What's New In?

Popular modern database Lotus Notes can hold thousands of data records. Lotus Notes is used widely all over the world by different organizations. Protection of this database file can be done by Lotus Notes user. It can be password protected.
