It was a response to the popularity of the Architectural Desktop software. According to Autodesk, it was designed to help architects and civil engineers build better architectural designs, quicker and more easily. It has full text search capabilities, which allow users to quickly find parts of drawings and objects, and a 'vectorizer' that converts everything in a drawing to a vector format, which is much more readable. It is a native CAD program, rather than a plug-in for other programs. AutoCAD 2020 for Archicad

Bonds is accused of his fourth such investigation in two years. Prosecutors were unable to convince a federal grand jury that there was sufficient evidence to support an indictment in the previous three cases, and they are unlikely to be successful again. Bonds is accused of obstructing justice, giving false statements to federal authorities, and failing to truthfully answer questions from the grand jury. He pleaded not guilty to all three charges in June, when a grand jury in San Francisco indicted him on all counts. He was then released on \$3 million bail. Today, the Los Angeles County district attorney, who also had been investigating Bonds, said it had "decided not to prosecute" Bonds, and he said it was possible the grand jury would indict Bonds in the future. A federal prosecutor, however, said the grand jury "has no intention of charging him." Bonds has been accused of using performance-enhancing drugs and has been investigated by federal authorities as part of the BALCO steroid investigation. Several reporters and bloggers noted today that the Oakland Athletics' season-ending record for the most home runs in a single season was not broken, as the Giants had claimed in their press release, because of the San Francisco Giants' mark of 73 home
