AutoCAD [32|64bit]

Ad Overview of Autodesk CAD Features Cracked AutoCAD With Keygen is designed to be user-friendly with many features that make drawing easier and speedier. It is a commercial product and is priced accordingly. Like all CAD programs, it is used for two main purposes; drafting and rendering. Drafting involves creating plans, designing parts of products and appliances, and graphic design. Rendering is the process that converts the technical drawings and models into visual images. The following are AutoCAD's main features: The ability to create vector (straight) lines. The ability to create a class of lines that are either automatically or manually connected by the "line-tool" in the line and multipoint drawing tools. The ability to create a class of curves, with the option to control how many points are created along the curves by setting the point-tool's number-of-points setting. The ability to create a class of surfaces, such as circles, ellipses, or rectangles. The surfaces have variable points along their outlines. The ability to edit existing polygon shapes and curve (non-vector) shapes. The ability to create bezier curves. The ability to convert existing CAD objects and 2D drawings to 3D objects. The ability to rotate 2D drawings, which allows for the creation of stereoscopic views. The ability to zoom in and out, and to pan (move) the drawing. The ability to create and manipulate dotted lines. The ability to create a class of arcs, with adjustable angles. The ability to create a class of rounded rectangles, which has a variable number of corners (often 2 or 4). The ability to create a class of open polylines. The ability to place existing CAD objects on a drawing. The ability to create a class of closed polygons, which have a variable number of corners. The ability to create text. The ability to insert existing shapes into a drawing. The ability to create a class of boxes, circles, rectangles, and polygons, which have a variable number of sides (vertices). The ability to create a class of compound shapes, which are composed of multiple primitive shapes. The ability to create a class of solids, which are composed of multiple primitive shapes. The ability to create a class of beams, pipes
